(Exercise) Manage Across Projects

1. Review the options from these two sections, Manage Across Tasks - and - Manage Across Projects, to identify practices that you think would be helpful for you and your team to manage across multiple projects. As before, feel free to select as many or as few as you deem helpful. Ideally complete this review exercise collaboratively with your some or all of your project team members.
2. Schedule time with your project teams and together review and commit to the 'Manage Across Project' practices selected.
3. After a few weeks, gather the team and review the effectiveness of the 'Manage Across Projects' practices selected, and adjust as necessary.
